

- A) How will you achieve this in AI?

Conduct a feedback survey to the employees about the current work/job/role they are doing. Ask them to write as the comments their satisfaction level and challenges they are facing in the current role/work.

- B) Find out the 3 -Stage of Problem Identification

1. Stage: NLP (Comments as text)
2. Supervised
3. Classification – Interested/Not interested

- C) Name the project

Employee Satisfaction survey

- D) Create the dummy Dataset.

S.No.	Emp No.	Comments	Label
1	12321	Positive comments	Interested
2	23345	Negative comments	Not Interested
3	52323	Positive comments	Interested
